

AC Power Supply

Nvis 230P

Nvis 230P “AC Power Supply” is a versatile product mainly used in electrical and electronic engineering laboratories for the purpose of conducting experiments over AC circuits. This unit provides 0-220V Variable AC output and 6V-0-6V & 12V-0-12V step down AC Voltage with adequate protection schemes. Digital voltmeter and ammeter are being used for better resolution and accuracy.

Features

- Stand alone operation
- Equipped with single phase auto transformer for AC variable supply
- Digital controller based measuring instruments for better accuracy
- Exclusive and rugged design unit
- Over Current and short circuit protections.
- Supply indication lamps

Technical Specifications

Input Mains : 230V AC $\pm 10\%$, 50Hz

AC Variable Output

Voltage : 0 to 220V $\pm 10\%$

Current : 2A

AC Step Down Output

Voltage : 6V - 0 - 6V $\pm 10\%$,
12V - 0 - 12V $\pm 10\%$

Current : 2A

Digital Meters

AC Voltmeter (for AC variable output) : 300V

AC Ammeter : 10A

Single Phase Switches : 2 nos. (2Amp)

Designed & Manufactured in India by

Nvis Technologies Pvt. Ltd.

141-A, Electronic Complex, Pardesipura, Indore-452010, India.
